

Aanchal Kataria

SENIOR TEST AUTOMATION ENGINEER | SDET

Over 10 years of experience in quality engineering with a primary focus on test automation, API testing, and building scalable automation frameworks for complex enterprise systems. Extensive background in regression optimization, CI/CD integration, and Agile delivery across BFSI, Travel, and Insurance domains. Strong expertise in Selenium WebDriver, Rest Assured, Karate, and Cucumber (BDD). Passionate about driving quality strategy through intelligent automation, defect lifecycle management, and mentoring high-performing QA teams.

Professional Experience

Automation Test Specialist (Senior SDET)

Apr 2022 — Present

IBM · BFSI & Travel · Gurgaon

- Led the design and development of scalable automation frameworks using Selenium WebDriver, Rest Assured, TestNG, Maven, and Karate with BDD (Cucumber) for REST API and UI workflows.
- Developed, reviewed, and maintained automated regression test suites following Page Object Model (POM), ensuring high-quality software delivery and regression stability.
- Refactored and optimized automation frameworks, improving test execution efficiency, code maintainability, and test coverage by 40%.
- Integrated automation with CI/CD pipelines using Jenkins, GitHub, and Azure Repos, reducing release cycle by 25%.
- Managed defect lifecycle by logging, tracking, and validating issues using JIRA, TestRail, and Zephyr; reduced UAT issues through early root cause analysis.
- Actively participated in Agile ceremonies (daily stand-ups, sprint planning, retrospectives) and mentored junior QA engineers.

Tech: Java, Selenium, Rest Assured, Karate, TestNG, Cucumber, Maven, Jenkins, Postman, Newman, JMeter, JIRA, TestRail, Zephyr, GitHub, Azure Repos, Oracle, SQL Server

Test Specialist

May 2021 — Mar 2022

Fiserv · Fintech · Gurgaon

- Developed, reviewed, and maintained test scripts to ensure high-quality software delivery across functional, smoke, integration, and regression testing.
- Executed regression test suites, analyzed results, and identified defects to improve software quality across environments.
- Managed defect lifecycle by logging, tracking, and validating issues in TFS in collaboration with cross-functional teams.
- Participated in Agile ceremonies and delivered client demos for features developed by the Scrum team.

Tech: Functional Testing, JIRA, DNA, Oracle, TFS, SQL, HP ALM, Agile, Scrum, Confluence

Test Analyst

Mar 2016 — Apr 2021

Tata Consultancy Services · Travel · Gurgaon

- Designed and maintained automation test scripts integrated with Jenkins CI/CD, reducing manual testing time by 40%.
- Refactored and enhanced automation frameworks using Selenium WebDriver and Java, improving execution efficiency and long-term maintainability.
- Enhanced and extended the automation framework to support new features, improve scalability, and adapt to evolving technologies.
- Championed migration from Waterfall to Scaled Agile Framework (SAFe); expert in STLC and SDLC across Agile methodologies.

Tech: Selenium WebDriver, SOAP UI, API Testing, JIRA, Jenkins, Maven, Java, Git, Zephyr, HP ALM, Confluence

DOMAINS

- Travel & Hospitality
- Retail Banking & BFSI
- Insurance & Fintech

Key Achievements & Impact

- IBM:** Delivered Newman and Postman POCs automating legacy manual processes, reducing manual effort by 20%. Performed JMeter performance baseline testing and SQL-based backend validations on Oracle and SQL Server.
- Fiserv:** Triaged bugs across environments ensuring consistency; reviewed and updated test cases for production releases with onshore team coordination.
- TCS:** Restructured automation framework reducing test case creation and execution time by 30%. Collaborated with upper management to implement testing processes, increasing customer satisfaction by 10%.

Awards & Recognition

Client & Partner Success Award 2026 Outstanding delivery and client impact at IBM	Client & Partner Success Award 2023 Outstanding delivery and client impact at IBM
Manager's Choice Award (4×) Consistently recognised by IBM leadership	Level 4 Award Top performance recognition at Fiserv
Technical Excellence Award (5×) Travelport Client at TCS	

Core Competencies

Test Automation · API Testing (REST/SOAP) · Regression Optimization · Page Object Model · CI/CD Integration · Performance Testing · Database Validation · Risk-Based Testing · Defect Lifecycle Management · Cross-Functional Collaboration · QA Team Leadership
