

Aanchal Kataria

SENIOR TEST AUTOMATION ENGINEER | SDET

Senior Quality Engineering Professional with over a decade of experience specializing in the design, development, and optimization of scalable test automation frameworks. Advanced expertise in Java-based ecosystems, including Selenium WebDriver, Rest Assured, TestNG, and Page Object Model (POM) architectures. Expert in streamlining software delivery through shift-left testing and robust CI/CD pipeline integration (GitLab, Jenkins, Azure Repos). Strong champion of Agile methodologies with a deep background in comprehensive API testing, functional verification, and technical mentorship.

Core Competencies

Test Automation Architecture · Shift-Left Testing · Microservices Testing · API Testing (REST/SOAP) · Frontend UI Testing · AI-Assisted Test Generation · CI/CD Pipeline Integration · Behavior-Driven Development (BDD) · Page Object Model (POM) · Performance & Database Validation · Risk-Based Strategy · Defect Lifecycle Management · QA Team Leadership & Mentoring

Professional Experience

Fullstack Quality Engineer (Senior SDET)

Apr 2022 — Present

IBM · BFSI & Travel · Gurgaon

- Led design and development of scalable automation frameworks using Selenium WebDriver, Rest Assured, TestNG, Maven, and Karate with BDD (Cucumber) for REST APIs and UI workflows.
- Drove innovation by delivering a Generative AI POC that transforms API spec files into automated Karate scripts, accelerating test design and reducing manual authoring effort.
- Built automated regression suites following Page Object Model with Maven targets for reusable, maintainable test cases.
- Engineered shift-left testing by integrating automated quality gates into CI/CD pipelines via Jenkins and Git (Azure Repos) for continuous delivery.
- Improved test coverage by 40% and reduced release cycle by 25% through strategic automation and test optimization.
- Delivered POCs automating legacy manual processes with Newman and Postman scripts, reducing manual effort by 20%.
- Mentored junior QA engineers, conducted code reviews, and led the QA team overseeing test planning and defect management.
- Drove Agile ceremonies and defined risk-based testing strategies with continuous integration focus.
- Performed performance baseline testing using JMeter for API stability and SQL-based backend data validations on Oracle and SQL Server.
- Collaborated with developers, business analysts, and global stakeholders on end-to-end functional and regression testing.

Tech: Java, Selenium, Rest Assured, Karate, TestNG, Cucumber, Maven, Jenkins, Postman, Newman, JMeter, JIRA, TestRail, Zephyr, GitHub, Azure Repos, Oracle, SQL Server

Professional Experience

Test Specialist

May 2021 — Mar 2022

Fiserv · Fintech · Gurgaon

- Developed, reviewed, and maintained test scripts to ensure high-quality software delivery across functional, smoke, integration, and regression testing.
- Managed defect lifecycle by logging, tracking, and validating issues in TFS in collaboration with cross-functional teams.
- Participated in Sprint planning, retrospectives, backlog refinement, and daily scrums.
- Reviewed and updated test cases for builds and optimized test cases for production releases.
- Delivered client demos for features developed by the Scrum team; coordinated with onshore teams.

Tech: Functional Testing, JIRA, DNA, Oracle, TFS, SQL, HP ALM, Agile, Scrum, Confluence

Test Analyst

Mar 2016 — Apr 2021

Tata Consultancy Services · Travel · Gurgaon

- Developed automated smoke suite integrated with Jenkins CI/CD, reducing manual testing time by 40%.
- Restructured automation framework, leading to 30% reduction in test case creation and execution time.
- Collaborated with upper management to implement new testing processes, increasing customer satisfaction by 10%.
- Maintained automation suite and regression testing from QA through Production.
- Championed migration of test approach from Waterfall to Scaled Agile Framework (SAFe).
- Expert in STLC (Software Testing Life Cycle) and SDLC (Software Development Life Cycle) across Agile and Waterfall methodologies.

Tech: Selenium WebDriver, SOAP UI, API Testing, JIRA, Jenkins, Maven, Java, Git, Zephyr, HP ALM, Confluence

Awards & Recognition

IBM Excellence in Client Delivery & Partner Success 2026

Awarded for flawless test automation delivery and enterprise product quality.

Client & Partner Success Award 2023

Outstanding delivery and client impact at IBM

Manager's Choice Award (4x)

Consistently recognised by IBM leadership

Level 4 Award

Top performance recognition at Fiserv

Technical Excellence Award (5x)

Travelport Client at TCS
